COMBUSTION AND FLAME

THE JOURNAL OF THE COMBUSTION INSTITUTE

VOLUME 101 NUMBERS 1/2 APRIL 1995

Contents

R. K. CHENG (Berkeley, CA)
Volocity and Scalar Characteristics of Premixed Turbulent Flames Stabilized by Weak Swirl 1

A. P. ALDUSHIN, B. J. MATKOWSKY, and V. A. VOLPERT (Evanston, IL)
Stoichiometric Flames and Their Stability 15

A. M. MELLOR (Nashville, TN), D. A. WIEGAND (Picatinny Arsenal, NJ), and K. B. ISOM (Magna, UT)
Hot Spot Histories in Energetic Materials 26

P. L. C. LAGE, C. M. HACKENBERG (Rio de Janeiro, Brazil), and R. H. RANGEL (Irvine, CA)
Nonideal Vaporization of Dilating Binary Droplets with Radiation Absorption 36

TACHIH CHOU and DONALD J. PATTERSON (Ann Arbor, MI)
In-Cylinder Measurement of Mixture Maldistribution in a L-Head Engine 45

DAVID A. EVEREST, JAMES F. DRISCOLL, WERNER J. A. DAHM, and DOUGLAS A. FEIKEMA (Ann Arbor, MI)
Images of the Two-Dimensional Field and Temperature Gradients to Quantify Mixing Rates within a Non-Premixed Turbulent Jet Flame 58

K. SESHADRI and N. ILINCIC (La Jolla, CA)
The Asymptotic Structure of Nonpremixed Methane–Air Flames with Oxidizer Leakage of Order Unity 69

TIMOTHY GRIFFIN, WOLFGANG WEISENSTEIN (Daettwill, Switzerland), VIKTOR SCHERER (Mannheim, Germany), and MARTIN FOWLES (Cleveland, U. K.)
Palladium-Catalyzed Combustion of Methane: Simulated Gas Turbine Combustion at Atmospheric Pressure 81

N. N. SMIRNOV and I. I. PANFILOV (Moscow, Russia)
Deflagration to Detonation Transition in Combustible Gas Mixtures 91

GARY P. MILLER (Baton Rouge, LA)
The Structure of a Stoichiometric CCl_4-CH_4-Air Flat Flame 101

J. HERNÁNDEZ, A. CRESPO (Madrid, Spain), and N. J. DUIJM (Apeldoorn, The Netherlands)
Numerical Modeling of Turbulent Jet Diffusion Flames in the Atmospheric Surface Layer 113

PHILIPPE DAGAUT, MARCELLINE REUILLON, and MICHEL CATHONNET (Orleans, France)
Experimental Study of the Oxidation of *n*-Heptane in a Jet Stirred Reactor from Low to High Temperature and Pressures up to 40 Atm 132

JOHN R. REISEL and NORMAND M. LAURENDEAU (West Lafayette, IN)
Quantitative LIF Measurements and Modeling of Nitric Oxide in High-Pressure $C_2H_4/O_2/N_2$ Flames 141

J. DAOU, P. HALDENWANG, and C. NICOLI (Marseille, France)
Supercritical Burning of Liquid Oxygen (LOX) Droplet with Detailed Chemistry 153

SHIGEO KONDO, KAZUAKI TOKUHASHI, HIDEKAZU NAGAI, MASAJI IWASAKA, and MASAHIRO KAISE (Tsukuba, Ibaraki, Japan)
Spontaneous Ignition Limits of Silane and Phosphine 170

T. R. BLAKE and M. MCDONALD (Amherst, MA)
Similitude and the Interpretation of Turbulent Diffusion Flames 175

ROD W. SHAMPINE, RUBEN D. COHEN, YILDIZ BAYAZITOGLU, and CLAY F. ANDERSON (Houston, TX)
Effect of Agglomeration on Pulverized-Coal Combustion 185
F. F. GRINSTEIN and K. KAILASANATH (Washington, DC)
Erratum 192
J. C. JONES (Kensington, Australia)
Comment on "Comparisons of the Structure of Stoichiometric CH_4–N_2O–Ar and CH_4–O_2–Ar Flames by Molecular Beam Sampling and Mass-Spectrometric Analysis," by J. Vandooren, M. C. Branch, and P. J. Van Tiggelen 193
JACQUES VANDOOREN, MELVYN C. BRANCH, and PIERRE J. VAN TIGGELEN (Louvain-La-Neuve, Belgium)
Reply to Comment by J. C. Jones 195

COMBUSTION AND FLAME

THE JOURNAL OF THE COMBUSTION INSTITUTE

VOLUME 101 NUMBER 3 MAY 1995

Contents

S.-W. KIM (Cleveland, OH)
Numerical Investigation of Chemical Reaction–Turbulence Interaction in Compressible Shear Layers 197

C. F. M. COIMBRA and M. QUIEROZ (Provo, UT)
Evaluation of a Dimensionless Group Number to Determine Second-Einstein Temperatures in a Heat Capacity Model for All Coal Ranks 209

R. C. BROWN, C. E. KOLB (Billerica, MA), R. A. YETTER, F. L. DRYER, and H. RABITZ (Princeton, NJ)
Kinetic Modeling and Sensitivity Analysis for B/H/O/C/F Combination Systems 221

EDUARD MOSES, ALEXANDER L. YARIN, and PINHAS BAR-YOSEPH (Haifa, Israel)
On Knocking Prediction in Spark Ignition Engines 239

JACK B. HOWARD, JOHN P. LONGWELL, JOSEPH A. MARR, CHRISTOPHER J. POPE, WILLIAM F. BUSBY, JR., ARTHUR L. LAFLEUR, and KOLI TAGHIZADEH (Cambridge, MA)
Effects of PAH Isomerizations on Mutagenicity of Combustion Products 262

K. SESHADRI and N. ILINCIC (La Jolla, CA)
The Asymptotic Structure of Inhibited Nonpremixed Methane–Air Flames 271

M. L. RIGHTLEY and F. A. WILLIAMS (La Jolla, CA)
Analytical Approximations for Structures of Wet CO Flames with One-Step Reduced Chemistry 287

ÖMER L. GÜLDER (Ottawa, Canada)
Effects of Oxygen on Soot Formation in Methane, Propane, and *n*-Butane Diffusion Flames 302

BARTLEY B. EBBINGHAUS (Livermore, CA)
Thermodynamics of Gas Phase Chromium Species: The Chromium Chlorides, Oxychlorides, Fluorides, Oxyfluorides, Hydroxides, Oxyhydroxides, Mixed Oxyfluorochlorohydroxides, and Volatility Calculations in Waste Incineration Processes 311

A. P. ERSHOV (Novosibirsk, Russia)
Isothermal Detonation 339

TOHRU MITANI (Kakuda, Miyagi, Japan)
Ignition Problems in Scramjet Testing 347

C. L. CHEN and S. H. SOHRAB (Evanston, IL)
Upstream Interactions between Planar Symmetric Laminar Methane Premixed Flames 360

WEI BIAO FU and BAI LI ZHANG (Beijing, China)
Experimental Determination of the Equivalent Mass Diffusivity for a Porous Coal-Ash Particle 371

Brief Communications

EDWARD L. DREIZIN (Princeton, NJ) and MICHAEL A. TRUNOV (Odessa, Ukraine)
Surface Phenomena in Aluminum Combustion 378

P. Q. E. CLOTHIER, DELIN SHEN, and H. O. PRITCHARD (Downsview, Canada)
Stimulation of Diesel-Fuel Ignition by Benzyl Radicals 383

COMBUSTION AND FLAME

THE JOURNAL OF THE COMBUSTION INSTITUTE

VOLUME 101 NUMBER 4 JUNE 1995

Contents

JERRY C. LEE, RICHARD A. YETTER, and FREDERICK L. DRYER (Princeton, NJ)
Transient Numerical Modeling of Carbon Particle Ignition and Oxidation 387

SUNGHWAN CHO, DAVID MARLOW, and STEPHEN NIKSA (Stanford, CA)
Burning Velocities of Multicomponent Organic Fuel Mixtures Derived from Various Coals 399

SUNGHWAN CHO and STEPHEN NIKSA (Stanford, CA)
Elementary Reaction Models and Correlations for Burning Velocities of Multicomponent Organic Fuel Mixtures 411

AJIT DANDEKAR and LANCE R. COLLINS (University Park, PA)
Effect of Nonunity Lewis Number on Premixed Flame Propagation through Isotropic Turbulence 428

H. LEE and S. H. SOHRAB (Evanston, IL)
Hydrodynamic Aspects of Premixed Flame Stripes in Two-Dimensional Stagnation-Point Flows 441

YONY WEISS AND EZRA BAR-ZIV (Beer-Sheva, Israel)
Observation of Nonuniform Shrinkage and Activation of Highly Porous Chars during Combustion in an Improved Electrodynamic Chamber 452

G. J. SMALLWOOD, Ö. L. GÜLDER, D. R. SNELLING (Ottawa, Canada), B. M. DESCHAMPS (Rueil-Malmaison, France), and I. GÖKALP (Orléans, France)
Characterization of Flame Front Surfaces in Turbulent Premixed Methane/Air Combustion 461

D. A. SCHULT, B. J. MATKOWSKY, V. A. VOLPERT (Evanston, IL), and A. C. FERNANDEZ-PELLO (Berkeley, CA)
Propagation and Extinction of Forced Opposed Flow Smolder Waves 471

J. B. MOSS, C. D. STEWART, and K. J. YOUNG (Bedford, U.K.)
Modeling Soot Formation and Burnout in a High Temperature Laminar Diffusion Flame Burning under Oxygen-Enriched Conditions 491

Y. Y. LEE and S. B. POPE (Ithaca, NY)
Nonpremixed Turbulent Reacting Flow near Extinction 501

GEORGE P. FOTOU, STEVEN J. SCOTT, and SOTIRIS E. PRATSINIS (Cincinnati, OH)
The Role of Ferrocene in Flame Synthesis of Silica 529

J. B. A. CARD and A. R. JONES (London, U.K.)
A Drop Tube Furnace Study of Coal Combustion and Unburned Carbon Content Using Optical Techniques 539

Brief Communications

M. BACHMANN, W. WIESE, and K.-H. HOMANN (Darmstadt, Germany)
Fullerenes Versus Soot in Benzene Flames 548

A. MAKINO (Hamamatsu, Japan), and C. K. LAW (Princeton, NJ)
Burning Velocity of the Heterogeneous Flame Propagation in the SHS Process Expressed in Explicit Form 551

Volume Contents
